Open Sourcing the World

Open data Movement

Explain main principles of Open Data

Importance of transparency

- the more we are, the more cracks could be fixed
- something transparent is potentially more trustworthy

Benefits of Open Data

- greater interoperability
- better control on data, can be controled by more people

Example from SNCF

The SNCF has recently started an open sourcing process to provide consumers raw data. This allows newcomers to build interesting piece of software wxith minimal effort

Applied to politics

- **Pirate Party prones open sourcing and transparent governance**
    - as described by Rick Falvinge, the most important freedom is probably the information freedom
- The website nosdeputes.fr is a citizen's proposition to get a log of our deputes's acts

Open Source Movement

Main principles of Open Source

Why Open Source is not an economical suicide

Linus Torvalds' case

Software, but not only

- hackable devices (hardware)
- opencola / freebeer
- cooking recipes

Hackability my lover

Why hackability is the greatest chance we have to discover new things

Example from our childhood

mother and child songs

Science must be Open Source

- reproductability of researches
- no black-box effect on software/research
- some univeersities force their students to publish all their researches on Wikisource
